

Primed: The Back Pocket Guide for Transmen and the Men who Dig Them

by the Gay Men's Sexual Health Alliance

Primed: The Back Pocket Guide For Trans Men & The Men Who Dig Them is the first sexual health resource written by and for gay, bi and queer trans men. Based on an Ontario-wide assessment of the sexual health needs of gay, bi and queer trans men, *Primed* prioritizes the diverse bodies, desires, and sexualities of gay, bi, and queer transmen. Topics covered in the guide include: disclosure, cruising, safer sex and harm reduction, STIs and hepatitis A, B and C, and transmen and pregnancy.

CAS and the Gay Men's Sexual Health Alliance had hoped to include *Primed* in the Trans* Toolkit, but unfortunately our publishing schedules didn't align. *Primed* is currently being revised, and the new edition will be released later in 2015, in both English and French. It will be available from the CATIE Ordering Centre.

In the meantime, the original version is still available (in English only) on CATIE's website:
